

PRODUCT COMPLIANCE PORTAL

An aerial photograph of a dense, lush green forest. A paved road with white lane markings winds through the trees, curving from the left side towards the right. The trees are a mix of various shades of green, indicating a diverse ecosystem.

YOUR GUIDED PATH THROUGH
THE JUNGLE OF MARKET
AUTHORIZATION REQUIREMENTS

SIMPLIFY YOUR PRODUCT COMPLIANCE PROCESSES!

If you want to sell your products in different target markets worldwide, you need to know the various product compliance and safety requirements that apply. You can only put products on the market and avoid bans, sanctions or even product recalls if you take those requirements into account.

ROGER WILLCO allows you to bundle and manage all requirements relating to your compliant product in one tool – conveniently, centrally and reliably.

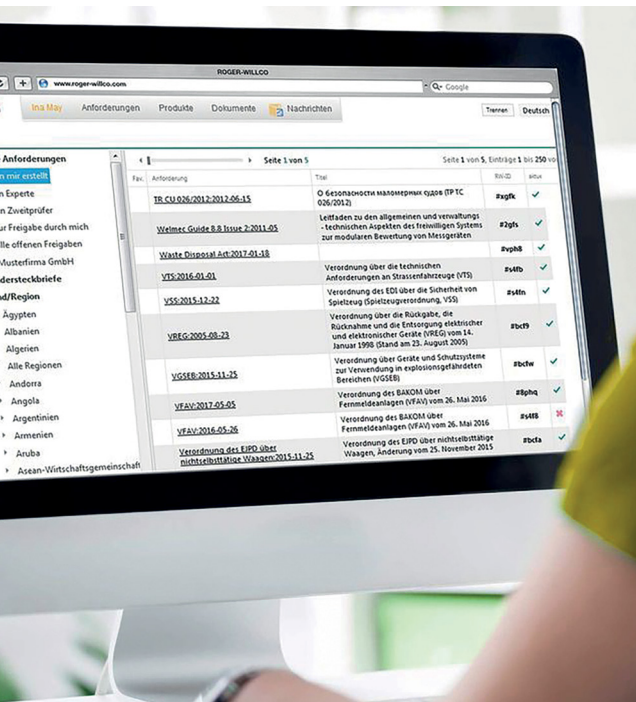

BENEFITS

Use just one tool to cover the whole process when gathering product compliance information

Save resources, costs and your nerves when researching and managing requirements for your products and target markets

Stay informed about new and amended requirements, so you can be proactive

Reduce liability risk and ensure that your company remains competitive in the long term

HERE'S WHAT ROGER WILLCO CAN DO

SMART FEATURES FOR INFORMATION MANAGEMENT

- 1 Rapid set-up as software as a service** without having to affect your company's IT infrastructure
- 2 Clear overviews** (list, matrix) of your requirements including options to add comments and define favorites
- 3 Simple linking** of regulatory requirements with your products or product groups
- 4 Convenient monitoring** of which requirements are current and applicable in your target markets
- 5 Creation and storage of declarations of conformity** that meet statutory requirements (for CE & UKCA) and other compliance-relevant documents
- 6 Easy import** of licensed standards documents (e.g. Nautos and AS+ data)
- 7 Direct access to full texts** for standards and laws in different languages, purchase of additional standards and management of full-text documents
- 8 Simple identification and communication** of changes or transition periods for standards and provisions
- 9 Uncomplicated uploading** of company standards and other internal information or documents

ACCESS TO INFORMATION VERIFIED BY EXPERTS

Regulatory documents

In ROGER WILLCO you can easily call up current international market authorization requirements, legal texts and linked standards information or guidelines. So if you know what's what in product authorization and which authorization document is required, you'll soon find what you need here.

Information packages with essential requirements

We also provide about 300 expert-checked information packages containing the essential statutory and standards-related requirements for your target markets. If you want to build your knowledge and stay on the safe side, then these ESSENTIALS are a good idea.

This comprehensive pre-analysis by GLOBALNORM saves your company several person days of researching, evaluating, summarizing and sharing this information.

Which target markets do we offer information packages for?

The focus is on the G20 countries. But Switzerland, Thailand and Qatar are also already included, and any country is available on request.

Which sectors do the information packages cover?

Auto-motive

Consumer Goods & Retail

Electrical & Wireless

Industry

Which product compliance topics are covered? For example:

Electromagnetic compatibility Electrical safety Radio RoHS WEEE

Machinery safety Product safety Cyber Security Eco-design

Metrology and measurement systems General approval requirements ...

Make ROGER WILLCO your central knowledge database for a product portfolio that is compliant worldwide!

Plus: Standards management

You can integrate the full texts of your existing standards into ROGER WILLCO using a Nautos or AS+ interface.

Plus: Internal company documents

Whether company standards or information you've researched yourself – existing documents can be uploaded centrally and are available to all users.

OUR SERVICE

If you have questions, you can get in touch with our independent product compliance experts.

If you're missing information on topics or target markets, our experts will be glad to get it for you.

Did you know...?

With regard to the **documentation requirement** in line with IATF 16949, DIN EN ISO 9001, DIN EN ISO 13485 or DIN EN ISO/IEC 1702, you must fulfil the requirement to have a system in place for updating and monitoring sets of rules such as standards, technical rules or legal provisions. ROGER WILLCO enables companies to easily demonstrate that they comply with the latest requirements **in line with recognized technical rules.**
